Avg Rating

9.93%

Return Rate(%)

Sales increased across the 3-year period, with the highest performance seen in the latest/highest sales year. Category and brand-level analysis shows that a few top categories and brands contribute major revenue. Return Rate and Delivery Days highlight operational performance, while Rating helps measure customer satisfaction. City and State-level sales show the strongest market regions.

Return Status ● Not Returned ● Not Applicable ● Returned

Year Wise Return Rate(%) by Category

Return & Delivery Analysis highlights return patterns, delivery performance, and customer satisfaction. High return rate by category or brand can indicate product quality, size, or customer expectation issues. Delivery speed and rating comparison helps understand whether delayed delivery affects customer experience.
